

GAS SAMPLING UNIT 12 LITER

The IKM Subsea **Gas Sampling Unit** is designed with ROV friendly grabbing bars and valve handles. The top valve opens for gas into the sample tank and the bottom valve vents out to sea so that operators can see when the gas sample bottle is full. The sample can be transferred from this unit to smaller 500cc sample bottles (IKM-1048787) when the unit is on deck. Available for rent.

SPECIFICATIONS

Model	Gas Sampling Unit
Type	Sampling unit 12 liter
Part number	IKM-1048398
Dimensions LxW	1657 mm x Ø400
Weight in air	51 kg
Weight in water	32 kg
Max pressure	150 bar
Sampling volume	12 liter
