

# MINI GAS SAMPLING UNIT

The IKM Subsea **Mini Gas Sampling Unit** is designed with ROV friendly grabbing bars and valve handles. The top valve opens for gas into the sample tank and the bottom valve vents out to sea so that operators can see when the gas sample bottle is full. The sample can be transferred from this unit to smaller 500 cc sample bottles (IKM-1048787) when the unit is on deck. Available for rent.
