

AX/VX GASKET TOOL HYDRAULIC

The IKM Subsea **AX-VX Gasket Tool Hydraulic** is designed to give the operator an effective and simple method of removing/installing an AX- or VX-Gasket by use of an ROV. A spring-loaded failsafe assembly, together with the lower locking plate in the sandwich assembly ensures that the AX- or VX-Gasket cannot be lost/dropped out of the tool by accident. The tool must be hydraulically operated to unlock and release the gasket.

SPECIFICATIONS

Type	AX/VX Gasket Tool Hydraulic
Model	AX/VX Tool Hydraulic
Part number	IKM-1064372
Material	316L, POM, PEHD
Height with handle	325,28 mm
Diameter	Ø550
Connections	2 x ¼" hoses
Operations	Hydraulic operated
Pressure	75 – 207 bar
Req. min flow	10 LPM
Weight in air	20,6 kg
Weight in water	8,39 kg
Number of hydraulic connections	2 hoses (one function)

Data sheet no. DTB-IKM-1064372 Rev. 01
