

SUBSEA ACID INJECTION CYLINDER

The IKM Subsea **Subsea Acid Injection Cylinder** can be used with a 18-3/4" AX/VX Cleaning Tool system. The acid is supplied by an ROV driven pump into the connection point on the tool.

SPECIFICATIONS:

Type	Subsea Acid Injection Cylinder
Model	Cleaning injection System
Part number	IKM-6004510
Material	440L, 316L, PMMA
Height	415 mm
Width	432 mm
Length	912 mm
Hyd. Pressure	100 Bar
Min. Hyd. Flow requirement	7 LPM
Weight in air	30 kg
Weight in water	14,3 kg
Volume	40 L

Data sheet no. DTB-IKM-6004510 Rev. 01
